Beware Swine Flu Vaccination

It Can Weaken Your Immune System and Damage Your Brain!

See How Big Government and Big Pharma Conspire to Force Medicines on You!

Dear Friend,

All across America, people are speaking out on healthcare reform . . .

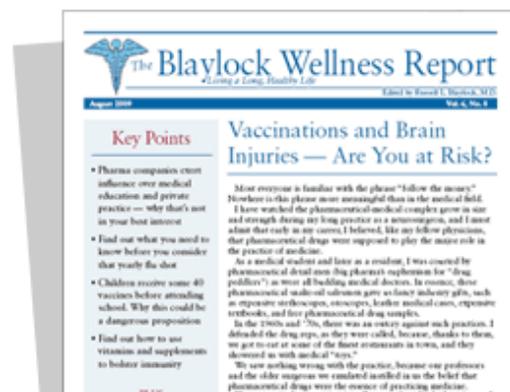

- What will it cost?
- Who will make medical decisions?
- What might the government force on us?

What isn't being discussed is how Big Government and Big Pharma already have colluded to force medications on us, including some that are truly harmful.

Take government's aggressive promotion of the swine flu vaccination . . .

Flu vaccinations contain a full dose of mercury, the most toxic substance known to man.

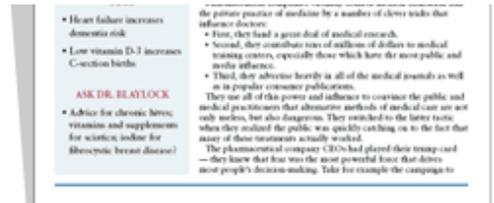

No amount of mercury is safe. Even very small amounts can weaken your immune system.

Vaccinations also cause **brain inflammation**. And severe brain inflammation will lead to . . .

- **Behavioral problems and language difficulties in children!**
- **Alzheimer's and Parkinson's diseases in adults!**

Hello, I'm Dr Russell Blaylock. For 26 years, I've been helping folks in my medical, neurosurgical, and nutritional practice not only get off of dangerous drugs that do little or no good but also get natural solutions that actually work!

As the editor of Newsmax's popular health letter, **The Blaylock Wellness Report** I routinely cover . . .

- **Important health issues in the news**
- **Dangerous and ineffective drugs to avoid**
- **Propaganda from Big Pharma and the U.S. government**

Most important, I offer **safe and effective natural therapies** for preventing and treating . . .

- **Heart disease, cancer, arthritis, neurodegenerative diseases . . .**
- **Fatigue, headache, allergies, digestive ailments . . .**
- **Diabetes, skin disorders, sciatica, bone health, and more!**

Today, I'm going to give you a far safer and more effective remedy for preventing flu. In fact, I want you to have a [FREE copy of my report](#) on this, **Vaccinations and Brain Injuries Are You at Risk?**

But first, I want you to know that . . .

Big Pharma's Far-Reaching Power

I've never been more concerned about **Big Pharma's near total control** of medical information in this country, as well as our government's "bought-and-paid-for" role in pushing its agenda.

I'm especially worried that, as we move toward universal healthcare a euphemism for **socialized medicine** we'll ultimately see government bureaucrats controlling medications for the entire population.

Today, they're pushing **risky vaccinations** that do more for Big Pharma's bottom line than for the health of the American people . . .

But there's also talk of putting everybody on a "**polypill**" that combines aspirin, blood pressure medicine, and cholesterol-lowering medication.

I'm not kidding! This crazy idea comes from the United Kingdom and and it has been proposed here to control healthcare costs. It's bad enough that . . .

Big Pharma wants everybody on cholesterol-lowering drugs, including children . . .

Cholesterol does NOT cause heart disease. And taking cholesterol-lowering drugs will not prevent heart attacks or heart disease but will do bodily harm. See my report, "**Cholesterol Drugs Are Dangerous**" by [going here](#).

I want you to be aware of **Big Pharma's hidden agenda**, and how companies get our government and media to promote their drugs, even when those drugs are harmful or ineffective.

That's why I want you to have a FREE copy of **Vaccinations and Brain Injuries – Are You at Risk?** Let's see what's in this valuable report for you . . .

Why Three Flu Shots This Fall?

You've seen the media blitz: The Centers for Disease Control and Prevention says you'll need two swine flu shots, as well as the regular seasonal flu shot.

Yes! Incredibly, it's urging three flu shots this fall! But why? Let's follow the money to find the answer . . .

When the **swine flu** story first broke, experts warned that it could be the worst flu since the 1918 pandemic that killed more than 50 million people worldwide, including 700,000 Americans.

But who were these experts?

People on the pharmaceutical and government payroll, that's who. They said it was the most unusual virus they had ever seen . . . that it could **kill in large numbers** . . .

Overnight, a compliant media spread this alarming news was spread far and wide.

Parents were scared out of their wits. Schools were closed. Millions with flu symptoms flocked to doctors and hospitals!

And what happened? Across the globe, 429 people died. Yes, that's unfortunate, but compared with the 36,000 people that die each year from regular flu it wasn't a serious threat.

Swine Flu Found to be Weak Virus

The Chicken Little doomsayers (read "drug company executives") were disappointed in these statistics. But now they're back scaring the public again, saying the "big event" is coming this winter!

And surprise of all surprises, drugmaker Novartis has a swine flu vaccine all ready to go. And the company says it won't give the vaccine away to the poor. Everybody must pay!

Imagine if it could sell **2 billion doses worldwide** and get \$5 a piece for them. That's \$10 billion.

Neat trick. But to succeed, it will need governments around the world insisting that their citizens get vaccinated while using taxpayer money to buy the vaccine for the poor.

Washington is on board. Can you guess why?

Big Pharma is the biggest contributor to Washington politicians both Democrats and Republicans. President Obama himself collected \$1.2 million during his presidential campaign.

Just be aware of what's going on . . .

Washington Politicians Bought

Already, Big Pharma's chief lobbyist, Billy Tauzin, has cut a secret deal with President Obama ensuring that drug prices won't be negotiated any lower in any healthcare reform legislation.

The American Medical Association, which is Big Pharma's silent partner, has a deal, too: No reduction of its lucrative licensing fees on "medical billing codes" will be allowed in any legislation.

Have you noticed that Big Pharma and the AMA are on board with Obama's healthcare plan? Even over the objections of most doctors!

Meanwhile, nobody is allowed to offer alternatives for preventing swine flu. Government medical bureaucrats are the sole source of official information, and they're getting their marching orders from Big Pharma, while you pick up the bill!

Well, I'm blowing the whistle!

As a neurosurgeon, I can tell you that vaccinations are not safe. They can weaken your immune system, cause brain inflammation, and even lead to neurodegenerative disorders such as autism, Alzheimer's, and Parkinson's.

Why risk these serious diseases when you can get better and safer alternatives for flu prevention and treatment?

Now's the time to take control of your healthcare decisions, get the best medical solutions, and not be tricked or coerced by Big Government and Big Pharma.

That's why today I'm extending a special offer to try **The Blaylock Wellness Report** at half price just 13 cents a day. That's not a misprint I really mean just 13 cents a day!

How Big Pharma Controls Medical Treatment

Are you aware that **Big Pharma has near total control of medical education in this country**, as well as how doctors practice medicine?

That means they control the treatment you receive. Here's how they do it:

First, they **fund most medical research** and set up the studies to favor their drugs . . .

Second, they **contribute heavily to medical schools**, especially those that have the most public and media influence . . .

Third, they **advertise heavily in medical journals** and popular consumer publications . . .

Fourth, they've long had an **alliance with the AMA** for the dual purpose of supporting one another and denigrating competitors.

So, when doctors got to medical school . . . they learn to diagnose diseases and to prescribe pharmaceutical drugs for those diseases.

Likewise, when you go to see your doctor, he or she prescribes drugs as your primary medical treatment.

Granted, some of this medicine is good, even life-saving. But much of it is worthless, harmful, even life-threatening. And you need to know the difference.

Cholesterol drugs, stomach-acid-reducing drugs, blood thinners, anti-depressants, sleeping pills, and many more drugs do more harm than good.

That's why I want you to try **The Blaylock Wellness Report** at half price, just 13 cents a day. That's also why I want you to have a FREE copy of **Vaccinations and Brain Injuries Are You at Risk?** [Go Here Now.](#)

Let's look at more of the valuable information in your free report . . .

Do You Know How the Flu Virus Works?

The flu virus causes immune cells to produce cytokine molecules that increase inflammation. Normally this is controlled, but in extreme cases, a "cytokine storm" occurs. This can cause tissue and organ damage, and even death.

When you're fighting the flu, you feel bad not because of the virus but rather because of the "cytokine storm."

But get this: All vaccines trigger their own cytokine storms. And researchers now know that increased inflammation is at the heart of most illness and disease. Which means the vaccines themselves are hazardous to your health.

The solution is to **avoid flu shots**, and if you've had them in the past, to take nutrients that will strengthen your immune system and reduce inflammatory cytokine activity.

The following nutrients fully detailed in your **FREE REPORT** are your best course for defense and repair . . .

- **Vitamins C and E, plus carotenoids:** See how a deficiency suppresses your immune system, a common problem among the elderly.
- **Vitamin D:** See how five to 10 times the RDA will protect you against flu, weak bones, cancer, and more, but you must get the "right type."
- **Curcumin and quercetin:** Combining the two in my recommended dosages will calm a cytokine storm and prevent bodily damage!
- **Magnesium, selenium, and zinc:** These can control inflammation and strengthen immunity, but see which types to use!
- **Resveratrol:** See the type and dosage to prevent viral replication. It also protects your brain from damage!
- **Three little-known supplements** that will increase immune-boosting glutathione in your cells, fight viral infection, and reduce inflammation!
- **Inflammatory foods** to avoid that contain omega 6 oils, iron, sugar, mercury, and fluoride.

Unanswered Questions on Risky Vaccines

Also in your FREE report, **Vaccinations and Brain Injuries Are You at Risk?** you'll find out . . .

- **Why many doctors refuse to take the same vaccines they recommend to their patients!**
- How better nutrition and sanitation, not vaccines, wiped out childhood diseases in this country!
- **Why studies showing that vaccines weaken the immune system have been suppressed!**
- Why parents are told their children need 36 to 40 shots before attending school, even though frequent vaccination can cause

brain damage!

- **Why seniors are told to get flu shots every year, even though repeated vaccination can lead to Parkinson's and Alzheimer's!**

Want to be aware of Big Pharma's agenda and how Washington and the media promote it? Want safer and better alternatives to prevent and treat illness and disease?
