The Most Important Information on our planet NOW!!!

We have removed our MMS and SML sites because of the need for people to understand what is really happening in the world and not just simple survival techniques when people still will spiral down to death regardless of what we do to keep you alive a little longer. The question of our beginning and our future as humans has long been a question of debate and speculation. The idea of a living and involved creator God makes some recoil since the insanity of nearly all religious beliefs is absurd even to people with basic intelligence. In spite of this a true GOD does exist and the Bible in Hebrew calls him YHWH or Jehovah in English. The **whole** life/death cycle is not an intelligent agenda and its clear the universe and life forms were created by a person with some care and involvement. It's much too complex to appear by random chance. So what are we here for? As radical as this may seem we are under a test of obedience and it's more like a nursery school and our lives are just in an infant stage so we, as free willed creations, can learn sustainable morality to function in a way that will not cause harm or distress to anyone. So far, we have failed miserably. Jehovah is going to allow mankind to finally self-destruct in a Great Tribulation that ends in a major destructive thermonuclear & volcanic event apply called Armageddon... a **temporary** removal of all humans. Our creator God will not allow even one creation to be lost forever as he has arranged from the start of disobedient man to put them all through a series of educational processes with the intent for life to have no end. Sound wild and crazy? Certainly! We've all been scammed by Satanic forces that operate through governments, nationalism, prejudice, hatred, wars & chronic disagreements. The world, folks, is nothing but a "court case" allowed by a loving creator to establish rightful sovereignty and for multiple thousands of years. He's given the sons of men a chance to establish once and for all how to be free-willed and function with peace, love of neighbor and use the earth in a way to advance goodness. There has been enough resources to house, cloth, feed and care for all who have lived. What,

Questions?

Email: wc@2ndcfl.com

however, have we done? Divided with nationalism, killed to steal from our neighbor, lied for personal advantage, betrayed trust, ruined the earth in the name of technology, created religious systems functioning with absurd doctrines that promoted hatred in the name of love but mostly... mankind has assumed he is above all God's laws and as a child that needs tough love discipline, we are about to destroy ourselves. We have moved into the period of the Great Tribulation and soon the horrors beyond anything man has seen or done in all history will be our final lesson. Our hope is everyone will seek the true God and not the images implanted by the Satanic religious system. Salvation is possible if you discard the posture of self-assurance, relying on others to intercede for you and all the things taught in this deluded world and beg the God Jehovah and Christ Jesus to open your eyes... NOW!
