WND, 'the greatest cover-up in history' ... and a new threat!

WND, 'the greatest cover-up in history' ... and a new threat!*David Kupelian on the high cost of telling the truth*

Dear friend of WND,

They never stop.

Last week, Facebook threatened to completely unpublish WND's Facebook page – after 14 years of daily maintaining and updating our page, which close to a million readers use to access WND's top stories daily.

Why?

Why would Facebook cut off America's oldest independent Christian online news organization?

The reason, according to Facebook, is a [column](#) we published on April 5 by Joel Hirschhorn, a well-known expert on COVID-19 and author of "Pandemic Blunder." It seems Facebook's "fact-checkers" didn't like the column, which started like this: "Looks like there has been massive under-counting of COVID and vaccine deaths. A new poll by Rasmussen has some data that validates what many of us already believe, namely that the vaccines are dangerous, not 'safe and effective' and need to be pulled from the market immediately."

Oops, can't have that! Not when Big Tech, which has both enforced and participated in the massive lying and deception campaign regarding COVID-19 throughout the pandemic, still wants to protect the reputation and viability of the "vaccines," not to mention the immense financial interests of Big Pharma.

This kind of attack on WND has become a regular event. In fact, let me share one more extraordinary COVID-related attack with you, one which is not just a threat, but that has actually damaged us severely.

More than three years ago, on Feb. 27, 2020 to be exact – near the very beginning of the COVID-19 pandemic that would kill 7 million people worldwide, including at least million Americans – WND was confronted by the internet's self-appointed guardian of truthful reporting, Newsguard, about publishing "misinformation" regarding the origin of the dreaded virus.

WND's article – like countless subsequent reports we've published over the last three years – laid out the evidence that the SARS-CoV-2 virus originated in a Chinese laboratory, and not in an outdoor "wet market" down the street.

You remember the "wet market" theory, right? Someone purchased an anteater-type mammal called a pangolin to eat, and the bat coronavirus inside the creature "jumped species" into a human. That was the theory that was considered WAY more credible than the crazy idea that the pandemic might have originated a few hundred yards up the street, in China's only biosafety level-4 laboratory that just happened to have been conducting insanely dangerous "gain-of-function" experiments on bat coronaviruses.

But getting back to my story ...

"Firstly," Newsguard authoritatively informed us in an email, "medical authorities have found no evidence that the virus was created intentionally or otherwise in a lab." Moreover, added Newsguard, "the CDC states that its research suggests 'recent emergence of this virus from an animal reservoir.'"

Because of this "fact check" – which now virtually everyone in the world knows and admits is a lie, except maybe a few diehards in China – Newsguard downgraded WND's "reliability" rating, since we had now been exposed as wild-eyed purveyors of COVID misinformation, conspiracy theories and fake news. Newsguard ratings matter since they directly impact a news organization's advertising revenues, with low ratings scaring away the better-paying advertisers.

Fast forward to today, when fully THREE YEARS LATER, the U.S. government recently conceded – FINALLY – that what WND reported in early 2020 and continuously ever since, was absolutely right. That is, the COVID-19 pandemic really did originate in the Wuhan Institute of Virology, where Chinese communist military scientists were conducting controversial and reckless research on bat coronaviruses – to purposely make them even more lethal and deadly to human beings. They succeeded. And all secretly funded by you, the U.S. taxpayer, courtesy of mad scientist Dr. Anthony Fauci.

Of course, as we all know, Fauci then proceeded to become the architect of America's disastrous pandemic response, which he got largely from China. Indeed, virtually everything Fauci decreed for America – from lockdowns, school closures and masks, to unproven-and-dangerous "vaccines," "boosters" and mandates, to attacks on safe-and-effective ivermectin and hydroxychloroquine as well as natural immunity – were not only wrong, but epically and catastrophically wrong.

I don't say all this in the spirit of boasting, but in the spirit of upholding journalistic truth: WND was right on every single one of these issues from Day One, including the actual origin of the virus, the mass denial of which some are now calling "[the greatest cover-up in history.](#)"

Big Government, Big Tech, Big Media, Big Education, Big Business – even Big Medicine – were complicit in the cover-up.

But WND faithfully showcased the tiny handful of enlightened and heroic frontline doctors who were championing the forbidden truth about COVID and how best to manage it. We conducted groundbreaking video interviews with courageous physicians like Dr. Peter McCullough, Dr. Vladimir Zelenko, Dr. Robert Malone, Dr. Ryan Cole and many others, and we published regular columns by Joel Hirschhorn (a member of the Association of American Physicians and Surgeons), all of whom were proven right.

And we delivered their lifesaving message to you, day in and day out – over the last three years throughout the pandemic. Despite the constant attacks from Google, Facebook, Newsguard, the Southern Poverty Law Center and others.

Why am I saying all this? To let you know that WND has paid a very steep price for boldly publishing the truth.

Newsguard's low ratings are very costly to news organizations. As the conservative Washington Examiner [reported recently](#):

"It's devastating," Mike Benz, the State Department's ex-deputy assistant for internal communications and information policy, told the Washington Examiner. "The implementation of ad revenue crushing sentinels like Newsguard, Global Disinformation Index, and the like has *completely crippled the potential of alternative news sources to compete on an even economic playing field with approved media outlets like CNN and the New York Times.*"

But it's much worse for WND than simply Facebook and Newsguard. When Google permanently demonetized WND in late 2021, it cited three reasons for attempting to shut us down forever. One of those three reasons was the exact same as Newsguard's and Facebook's problem – WND's truthful and courageous COVID-19 pandemic reporting. Google did not like that either.

By the way, the other two reasons Google demonetized us were:

* Our reporting on how the 2020 election was rigged – something recent Twitter revelations, courtesy of Elon Musk, now PROVE beyond any rational dispute; and

* Our reporting on the demonic LGBT/transgender recruiting and grooming craze victimizing America's children, which has become its own epidemic of broken bodies and souls, destroying the lives of countless young Americans and causing skyrocketing rates of teen misery, depression and suicide.

So, we are persecuted for truthfully and professionally reporting on what are obviously some of the most important, life-and-death issues of our time – how to survive a global pandemic when almost everyone in authority is lying, the crucial importance of election integrity in an era when Democrats are eager to cheat in every way possible, and the predatory and flat-out evil child-grooming activities of today's "gender activists."

Friends, we at WND are simply doing the job Thomas Jefferson insisted was ESSENTIAL in a free country, when he wrote in 1823, "The only security of all is in a Free Press." WND's motto since 1997 has been "A Free Press for a Free People." Yet as you know, there are powerful forces – I just mentioned a few, but there are MANY others – hell-bent on completely destroying WND and whatever else is left of a Free Press in America.

And the truth is, the only countervailing force that can save us from this all-out, multi-pronged assault on our continued existence ... is you.

I would be less than honest if I didn't tell you that WND is really hurting right now. We are under continual attack, and yet donations and other revenues are down considerably, probably because the Biden economy is squeezing everyone so much. We understand.

Nevertheless, if you value and appreciate WND and want to see it continue its operations, [please support us financially](#). It is just as simple as that. There is no other way we will be able to carry on.

The grace of God and the generosity of donors has gotten us this far. So thank you very much for all of your past support.

But we need your continued help to keep going, to cover our costs and make payroll for our fantastic group of journalists, all of whom have taken significant pay cuts and missed paychecks entirely, yet who have stayed with us for the past two decades!

Here's how you can help:

[Please prayerfully consider making a generous tax-deductible donation to the 501c3 Christian nonprofit charity, the WND News Center.](#) You can make either a one-time donation or a monthly recurring donation, by credit card or PayPal. Whatever you can do is enormously appreciated.

You may also mail your tax-deductible contribution by making your check out to "WND News Center" and mailing it to: WND News Center, P.O. Box 100, 580 E Street, Hawthorne, NV 89415-0100.

For still other ways to help, please check out [HELP WND](#).

Thank you so very much for [helping in any way you are now moved to](#), during this tumultuous but critically important time for us all.

May God bless you and yours,

David Kupelian
